

Innotek Encase™

Thermoplastic Powder Coatings

Innotek Encase™ - G35 Series

Encase™ is Protech's line of thermoplastic powder coatings designed specifically for the finishing of wire goods and other corrosion prone products. Encase™ provides outstanding impact resistance, excellent flexibility, and powerful chemical resistance. When properly applied, Encase™ thermoplastic powder coatings meet the standards of the U.S. code of federal regulations 21CFR175.300, resinous and polymeric coatings, as well as FDA standards for direct food contact. Encase™ is the ideal coating solution for refrigerator and dishwasher racks as well as a wide range of household products.

Encase™, like all Protech products, is environmentally friendly and emits no harmful VOC's.

ADVANTAGES

- *Outstanding impact and chemical resistance*
- *Excellent flexibility*
- *Meets FDA standards for direct food contact*
- *No primer or curing required provides major energy savings*
- *Available in a wide range of colors and textures*
- *Ideal coating solution for a wide range of applications*
- *Environmentally friendly*
