

SANDTEX

SANDTEX is formulated to endure the test of time, the elements and the many application challenges. It is well suited to withstand harsh levels of UV radiation, inconsistent degrees of humidity, temperature variations and other severe weather conditions.

OVERVIEW

There are many challenges when trying to evenly apply traditional fine texture powders in production. Coarse grains or sharp edges are a nerve-racking problem. Moreover, traditional fine structure powders are sensitive to layer thickness differences during application, changing grain size during recycling, overspray, electrostatic phenomena, etc. The Protech Group has created Sandtex that eliminates these major problems and ensures you a high quality product tailored to meet the current demands.

Fine-textured powders (described as fine structure, sandtex, coatex, structure, soft touch, ...) have become very popular in the powder coating world in recent years. They look chic and feel pleasantly soft. Until recently, fine textured powder coating was mainly used for industrial applications, but since these types of coatings have also proven their worth covering aluminum profiles, they have become very popular for many more applications. Today 25 to 50 % of the powder coating applied to aluminum profiles is a Fine texture.

Your Benefits:

- Increased transfer efficiency
- Easy and safe to recycle
- Guaranteed even textured look
- Soft touch matt fine structure
- Aesthetically high-quality finish
- Minimum window framing

Our technical experts can support you in optimizing your machinery.

FORMULATING THE **RIGHT MIX**

For more than 45 years, the Protech Group has been developing and manufacturing coatings, paints, and specialty materials. Through quality and innovation, we formulate the right mix to protect and enhance what matters most to our customers. The Protech Group products are manufactured in more than 20 sites worldwide. We serve our customers in countless markets and industries, including construction, infrastructure, transportation, consumer goods, and healthcare.
